

Education

3-Year Advanced Diploma (Graduating 2027) – Computer Security and Investigations, Fleming College, Peterborough, ON

Honors BSc. – Biomedical Toxicology (minor in Neuroscience), University of Guelph, Guelph, ON

CompTIA Security+ (Scheduled for Summer)

Summary of Qualifications

- Strong analytical mindset with experience investigating complex system behaviour, correlating data across multiple sources, and documenting findings with precision — directly applicable to SIEM triage, threat detection, and incident response.
- Hands-on cybersecurity training through the Computer Security & Investigations program, including log analysis, detection logic development (regex/SQL-style queries), vulnerability assessment, and incident response workflows.
- Familiarity with IAM concepts, endpoint security, cloud logging (AWS/Azure), and defensive security tooling; foundational scripting ability in PowerShell, Bash, and Python.
- Demonstrated ability to teach, coach, and collaborate effectively; excels in team-based environments and communicates clearly with technical and non-technical stakeholders.
- Several years of laboratory and technical experience requiring meticulous documentation, adherence to procedures, and methodical problem solving — directly transferable to detection engineering and evidence collection.
- Proven leadership and coordination skills from supervisory roles and varsity athletics; thrives in high-pressure, time-sensitive situations requiring sound judgment and prioritization.
- Strong aptitude for critical thinking, pattern recognition, and rapid learning — consistently recognized for initiative, efficiency, and reliability.
- Captain of varsity heavyweight men's rowing team, awarded 2009 OUA Novice Coach of the Year, elected 2008 Oarsman of the Year for University of Guelph men's rowing team, Henley gold in 2008 men's heavyweight eight.

Work Experience

Technical Specialist & Analytical Chemist, Meta Valent Solutions, Beamsville, Ontario 2018 to 2020

- Assisted with consulting, solving water treatment and environmental challenges for mining and refining companies
- Conducted experiments in the laboratory and water treatment facility using analytical techniques to identify and provide solutions to problems in the treatment process
- Devised and tested potential solutions and conducted industrial scale pilot studies on processes demonstrated in the lab
- Collected and managed samples, collected and reported data, worked under minimal supervision while communicating with superiors on progress and experimental instructions

Event Server & Bartender, Ravine Vineyard Estate Winery Restaurant, St. Davids, Ontario 2015 to 2022

- Involved with the full set up and execution of events including corporate gatherings, family celebrations and weddings
- Responsible for gathering, assembling, and placing all the necessary items for room setup, often two or more bar locations, dinner service, wedding ceremony arrangements, as well as coordinating and directing the required staff
- Commonly recognized for outstanding work ethic, initiative, teamwork and motivation, efficiency, and pleasant attitude and demeanor
- Often the go-to employee for difficult, heavy, or labour-intensive jobs, tasks requiring special attention, and acting as a liaison between managers and staff

Flex Worker/Processing Operator, Post Foods Canada, Niagara Falls, Ontario

2015- 2018

- Operated pressurized and non-pressurized cookers, ovens and other equipment involved in cereal processing and packaging, including HACCP metal detector evaluations and associated quality control checks
- Other duties included packaging bulk boxes of cereal, additive mixing and handling, assembling cereal display modules, cleaning of production equipment and waste disposal.
- Recognized for work ethic, efficiency, and aptitude for problem solving

Events Supervisor, Vineland Estates Winery, Vineland, Ontario

2019 - 2020

- Conducted functions and weddings, acting as the primary point of contact between servers, guests, and kitchen staff upon guests' arrival and throughout events
- Managed such multiple simultaneous aspects and responsibilities as delegating staff duties, dinner, bar, and cocktail service, and instructing and communicating with wedding couples and guests to ensure smooth transitions according to detailed timelines

Biologist, Natural Resource Solutions Inc., Waterloo, Ontario

2012

- Responsible for monitoring bat populations around existing and potential future wind farm developments
- Performed a wide variety of tasks ranging from office duties to field work responsibilities
- Set up night vision cameras at dusk around possible bat roosting spots, and subsequently reviewed footage to identify and quantify bat activity in the area
- Monitored bat and bird mortality around wind turbines, identified species and collected specimens for further analysis
- Recognized for outstanding individual and team-based work habits and exceptional delivery of results

Research Assistant, University of Guelph Research Station Simcoe Campus, Simcoe, Ontario

2011

- Worked in Pomology (apple science) division, while completing final courses for undergraduate degree
- Performed manual field labour to collect fruit samples, record the number of fruit dropped per tree every week, and measure and record new shoot growth on young trees
- Duties also included data entry, and the evaluation of several fruit quality characteristics in the laboratory
- Techniques and equipment involved included: Gas chromatography, refractometry, colourimetry, iodine staining, water displacement density measurements, and the use of a fruit texture analyzer (FTA)

Evaluations Officer, Health Canada - Pest Management Regulatory Agency, Ottawa, Ontario

2008

- Worked in the Fungicide/Herbicide Toxicological Evaluation Sector developing critical reports, reviewing, summarizing, and confirming toxicological study data and research permits
- Composed reports critically analyzing key aspects of toxicological studies of new formulations and their effects on different organisms
- Became familiar with issues concerning the public, chemistry of new products, and latest projects being completed by the sector
- Improved technical communication skills while expanding understanding of research study protocol, methods, and discipline
